

## **Laboratory Technician - SYNTH-MED BIOTECHNOLOGY INC.**

**Location:** Toronto (in person)

**Type:** Full-time

**Available Positions:** 2

**Contact:** Dr. Ilana Talior-Volodarsky (Laboratory Director)

### **The Vision**

Synth-Med is reinventing drug delivery by leveraging the unique properties of Red Blood Cells. We are seeking a **Director of R&D** to lead our research efforts including the coordination of our preclinical experimental work.

### **About the Role**

We are seeking two **Laboratory Technicians** to join our growing team. The ideal candidates will have experience in **pre-clinical research** as well as previous experience following **Good Manufacturing Practices (GMP)** and **Good Laboratory Practices (GLP)**. The successful applicants will contribute to laboratory operations, analytical testing, and compliance activities supporting our research and development programs.

### **Key Responsibilities**

- **Sample Analysis:** Perform routine and non-routine analytical testing on raw materials, in-process samples, and finished products.
- **Compliance & Documentation:** Maintain records of all experiments and results and Standard Operating Procedures (SOPs) in compliance with GMP and GLP standards.
- **Equipment Care:** Calibrate, operate, and troubleshoot laboratory instrumentation Western Blotting, ELISA, Flow Cytometry, FPLC (Fast Protein Liquid Chromatography), TFF (Tangential Flow Filtration).
- **Quality Assurance:** Assist in investigations regarding product stability, storage conditions and process optimization.
- **Lab Maintenance:** Ensure the laboratory environment is kept clean, organized, and stocked with necessary reagents and supplies.

### Essential Qualifications:

- **Education:** Bachelor's or Master's Degree in Pharmacology, Chemistry, Biochemistry, Molecular Biology or a related scientific field. (Associate degree with equivalent experience will be considered).
- **Experience:** minimum 2 years of relevant experience with regulated laboratory environment.
- **Technical Skills:** Proficiency in Western Blotting, ELISA, Flow Cytometry (FlowJo) and Biomanufacturing. Strong working knowledge of Microsoft Office Suite applications (Word, PowerPoint, Outlook, and Excel). Experience with GraphPad Prism and cloud-based platform, such as Benchling.

### Bonus Points

- **Regulatory Knowledge:** Hands-on experience working within **GMP/GLP** frameworks.

**Application Deadline:** Applications will be accepted until the positions is filled.
